

RAMCRETE

The Ram-Pan:

a sustainable concrete washout solution

Service

The Ram-Pan service is recognised for delivering a valuable, eco-friendly solution at all stages of concreting, from site inspection to completion.

These industrial washout pans are designed to hold cement products and are easy to transport on-site; four lifting eye and forklift channels are within the footprint of the pan.

Our sustainable solution ensures that there is no risk to the environment during concrete pumping activities, allowing the process to remain discharge compliant.

Purpose

- ✓ We help contractors reduce spending and waste but boost productivity by managing on-site concrete washout needs
- ✓ The Ram-Pan keeps the site tidy and prevent environmental contamination
- ✓ Ram-Pans are designed to perform and last through the harshest construction sites
- ✓ Our watertight containers only need a polythene liner for a quick & easy clean
- ✓ Suitable for concrete pump and pipeline, truck mixers and concrete skip washout solutions

Contact our shipping team:

We offer delivery and collections of the Ram-Pans daily (POA)

They are available from our Maidenhead, Kent & East London depots
